

## Inflatable kite repairs

---

Please complete this page, print it out and enclose it with your kite.

Your details:

Name: \_\_\_\_\_

Telephone number: \_\_\_\_\_

Text number: \_\_\_\_\_

Email address: \_\_\_\_\_

To ensure I can 'keep you in the loop' regarding receipt, repair and return of your kite, ensure you give me your text, phone or email details.

Your kite details:

Make: \_\_\_\_\_ Model: \_\_\_\_\_

Size: \_\_\_\_\_ Colour: \_\_\_\_\_

To ensure I find the areas to be repaired, please mark the damaged area on your kite with masking tape, pvc tape or other mild contact tape that can be easily removed. I cannot guarantee that I will find all damaged areas unless you have marked them. However I will check other areas that you might not have marked as damaged, for example, bridals, pulleys, bladders, struts, other rips and scuffs. To help me locate possible damage that you have not noticed please write in the space below:

- How the kite sustained the damage? For example, 'rolled down the beach'.
- How the problem occurred? For example, 'leading edge opened up'.

---

---

I will let you know if I think your kite is beyond economic repair, for example the fabric of the kite may be worn out or have too much UV damage. I can advise you on options other than repair.

Jonnie Eisler has been using, repairing and dealing with inflatable kites since 1998. He has experience and knowledge of the market value of most used kites, their condition and any inherent problems. He keeps up to date on new developments, designs, trends, solutions and problems.

Please circle the area(s) of damage on the diagram(s) below:
